Superior design

At Garador™ we see a home as a unique expression of its owner, we understand that a home not only meets your functional needs, but your emotional needs as well. Our unwavering commitment to this vision

allows us to create doors that not only enhance the character of the home but that of the owner too.

The Summit range takes natural cedar garage doors to the next level.

QUALITY CEDAR

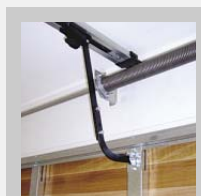

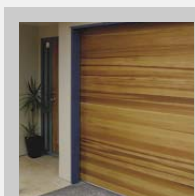

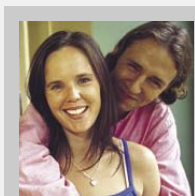

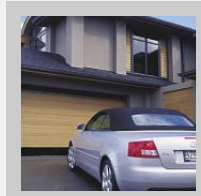

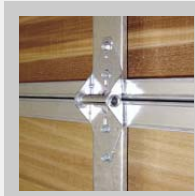

Our Summit range of Cedar Sectional Doors are constructed with high quality cedar. Imported direct from Canada and milled in our factory, we make sure only the finest boards make the grade. Since cedar has natural warmth and excellent insulation properties we don't skimp on thickness. Should you change the way you use your garage space change in the future, additional insulation can be added to further guard against heat loss and noise, just ask your local Garador™ distributor.

ROBUST HARDWARE AND FRAME

Heavy-duty steel hinges and componentry are matched to the roll-formed galvanised steel frame for long lasting strength, security and durability. The cedar is glued and screwed to the frame, then clamped to ensure positive adhesion. The high tech glue used on the Summit range was especially designed for demanding industrial applications.

DRYDEN'S WoodOil™ PROTECTION

Made in New Zealand to suit New Zealand conditions, Dryden's WoodOil™ clear base is applied to all Summit Cedar Sectional Doors as a water-repellent, non-filming timber protector. A further application within 3 months can be tinted to match individual colour schemes. To find out more, visit Dryden's online at www.woodoil.co.nz

STYLES TO SUIT YOUR HOME

The Summit range of Cedar Sectional Doors are available in a variety of options such as slender slats joined in a Tongue & Groove method to create a "V" grooved effect that runs either horizontally or vertically. There is a Ply & Batten alternative providing clean lines that will complement most modern architectural styles and finally Raised Panels, available in two width options, combine the classic charm of yesteryear with the contemporary styling of today's doors to provide a stunning look.

AUTOMATIC OPERATION

Add a Controll-A-Door®P garage door opener from Garador™ and you add security, convenience and safety to your new Summit Cedar Door. Choose from the 1/2 hp CAD-P workhorse with all the standard features you could need, or treat yourself with the elite CAD-P Diamond series opener. The CAD-P Diamond has a whisper quiet motor ideal for those who are noise conscious and its award winning contemporary design with sleek curves will be an asset in any home.

YOU DESERVE THE BEST

Your local Garador™ dealer will provide a friendly and professional measure, quote and installation service. They will advise you on the best product for your application and demonstrate the features of the Garador™ range. Call 0800 GARADOR now.

FUTURE-PROOF BUILDING

Garador is committed to Future-Proofing the homes of our customers. This Quality Assurance comes from using only the highest quality materials and components. With a Future-Proof building, you can relax with peace of mind for many years to come.

See our Ultimate Garage Door Guide for a complete list of accessories.

With ongoing product developments, the manufacturer retains the right to change products and specifications without prior notification. If a specification is critical to end use, please contact the manufacturer first. This information is provided without prejudice to the standard terms and conditions of the sale of the manufacturer. This brochure supersedes all previous brochures.

Given that timber is a natural product, variations in colour and grain on a door can be expected. The manufacturer will not accept any warranty claims for variations in colour and/or grain.

All timber finished doors should be cleaned and maintained regularly according to the timber finish manufacturer's recommendations.
